

#### Spin-off of the University of Catania

https://www.nextvisionlab.it/

# Artificial Intelligence to Assist Humans Where They Live and Work

#### **Antonino Furnari**

**Chief R&D Officer** 

<u>afurnari@nextvisionlab.it</u> <u>antonino.furnari@unict.it</u> www.antonino.furnari.it

#### Founders

**Dr. Francesco Ragusa**Chief Executive Officer
Chief Technology Officer

**Dr. Antonino Furnari** Chief R&D Officer

Prof. Giovanni Maria Farinella Chief Scientific Officer

# An academic Spinoff of UNICT based in Sicily with an International Vision

## Team

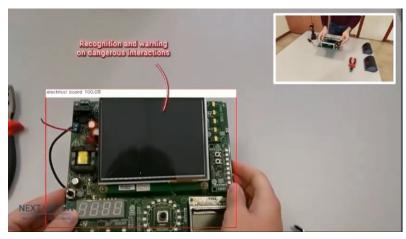

### **Three Solutions**

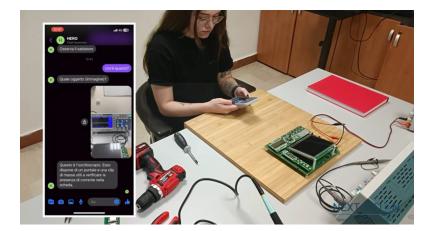

NAIROBI: Indoor Visual Navigation

NAOMI: Image-Object Interaction Understanding

**HERO:** Human-Machine Interaction

### **NAIROBI**

**Intelligent Navigation** 

Image-based Localization

**Augmented Reality** 

Multi-platform

Founders of Next Vision are authors of <u>patents</u> related to the developed technologies

### Demo Video

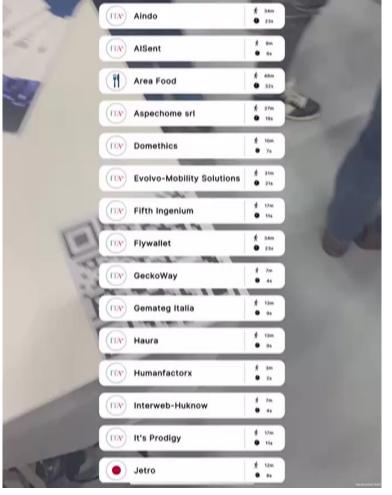

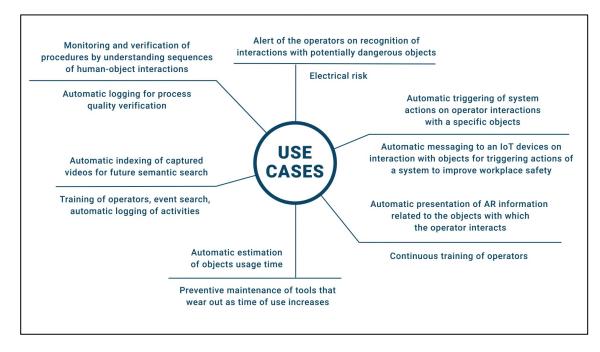

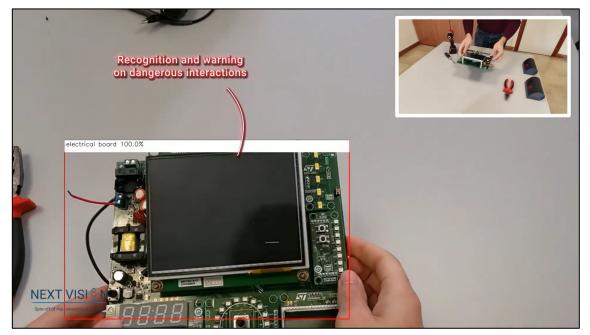

CES, Consumer Electronics Show

#### **NAOMI**

• **NAOMI** is an Al Assistant able to support humans to monitor interactions, predict/anticipate next interactions, verify correctness in a sequence of interactions.

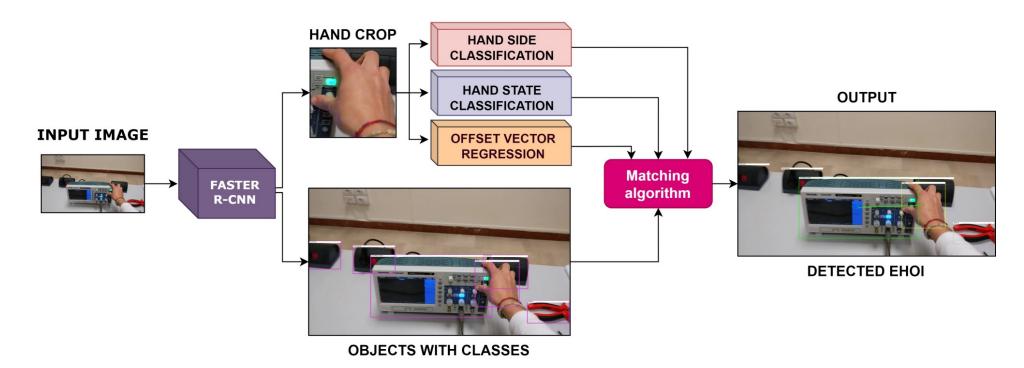

Use cases

The video shows an example of object interaction monitoring. The operator is notified on an interaction with a dangerous object.

#### NAOMI: Architecture

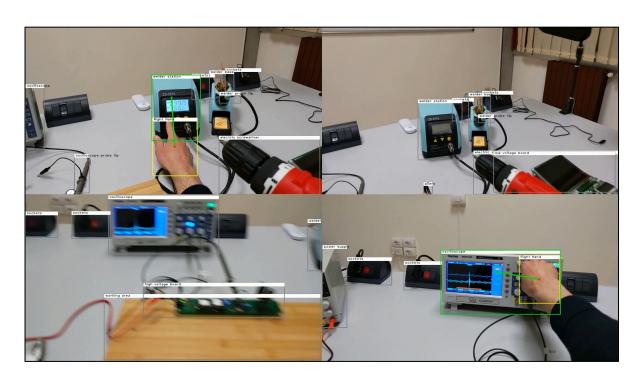

- Our system extends a two-stage object detector with additional modules specialized to recognize humanobject interactions.
- The proposed method exploits different data signals, such as instance segmentation maps and depth maps, to improve the performance of classic HOI detection approaches.

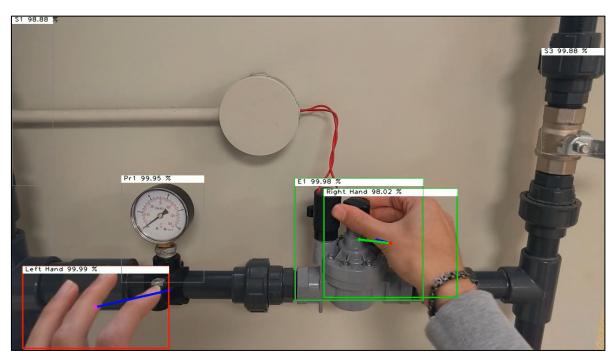

Rosario Leonardi, Francesco Ragusa, Antonino Furnari, Giovanni Maria Farinella (2022). Egocentric Human-Object Interaction Detection Exploiting Synthetic Data. In International Conference on Image Analysis and Processing (ICIAP).

### Demo Video: Industrial scenarios

**Industrial Laboratory** 

Hydraulic Panel

#### GOAL:

 Support workers in unknown industrial domains and complete industrial procedures with ease

#### **FEATURES**:

- Understands questions posed in natural language
- Exploits visual cues obtained from images made by the user from their point of view
- Answers in natural language

What's this object? How am I supposed to use that?

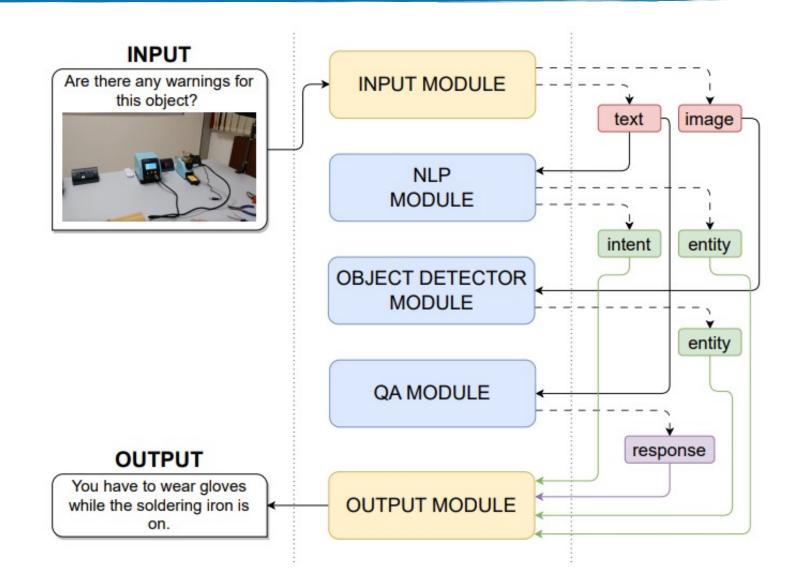

This is the power supply.

Adjust the current knob until
the green LED lights up.
